1. November 2021,

Siemens,
Smart Infrastructure ,Internal Services,
Zurich, Switzerland.

Dear Sir or Madam,

I am writing to express my interest in the Werkstudent Informatik Softwareprogrammierung Zugbeeinflussung position. I learned about this opportunity from the LinkedIn platform and I would be very motivated to work in this domain.

Currently majoring in Computer Science at ETH Zürich, I will receive my Bachelor degree next spring. While I have solid knowledge of the computer science theory, I lack hands-on experience and I would like to gain some before getting my first diploma. I feel that the position you propose would give the opportunity to broaden my interest spectrum while at the same time allowing me to get an insight on how it is to work with a team of highly motivated people. Additionally, I have wanted to dive into the day-to-day of one of the "big firms" for quite some time.

Furthermore, I think that my two internships at a military-grad coating facility have given me a good impression on how to work in a technical environment, and I think I won't have any problems adapting to a new, but similar work environment.

Additionally, I am sure that my fluency in both French and German will be an asset in working with such an international company such as Siemens.

I would like to meet you and discuss the job opportunity.
Please let me know if you have any questions. You can reach me per mail at dcolonna12.dc@gmail.com, or by phone at +33652258564.

Thank you for your consideration.

Yours sincerely,

David Colonna
